Professional Summary

Embedded systems R&D engineer with 11+ years designing and delivering MCU-based products across automotive, medical, industrial, and utility domains. Strong firmware and driver-level programming, hands-on PCB design and simulation, hardware debugging, test/validation, and end-to-end product development from concept to certified production. MBA-qualified technical leader who translates market and business requirements into technically sound, manufacturable solutions. Skilled at bridging product strategy, business priorities, and engineering execution—leading cross-functional teams, managing stakeholders, and aligning R&D roadmap with commercialization, certification, cost and timeline constraints.

Education

Master of MBA

Institute/University: Khajeh Nasir Technical University (KNTU)

Bachelor of Electronics Engineering

Institute/University: Shamsipour technical University

Work Experience

Embedded System Developer

Freelancer

Tehran, Iran

September 2019 - Present

Tasks and Achievements

Independent embedded systems R&D contractor delivering MCU-based products from concept to production for medical, industrial and utility customers.

R&D expert

Sazeh Pouyesh Co.

Tehran, Iran

December 2017 - September 2019

Tasks and Achievements

Automotive electronic circuits based on MCUs Embedded programming, Driver Level Programming. Quality and Control Standards implication (Such as Reliability and longitivity)

CVBUILDER.ME

Projects

Ultrasonic Flow Meter for Domestic Water Consumption Monitoring

Acquiring certifications

Electromagnetic Flow Meter for Agricultural Water Consumption Monitoring

Certified, mass production

Medical CO2 Laser Control System

Certified, production

Medical Nd:YAG Laser Control System

Certified, production

Pipeline Cathodic Protection Monitoring System

Production

Medical Laser Equipment GUI

Certified, production

Industrial Refrigerator Control System

production

Industrial Ventilation Control System

Commercial Weighting Balance

Industrial TCP/IP-based Infrared Smoke Detector

Production
